**Subject:** Jorgensen Forge Rolloff Box Shipping

Good Morning,

I need to schedule pickup and shipment of one 20 cy MP Environmental dewatering box, #5637. The box is profile RXN00066. It was originally ordered through Clean Harbors, who had MP bring out the boxes. I think the box was originally ordered under #V0342.

I will need the **short-tail** truck to pickup the box at the Jorgensen Forge site and move it through a shared Boeing/Jorgensen side gate to the Plant 2 property. There (west side of the 2-81 building) a second truck should meet it to ship the box off from Plant 2 to the disposal facility.

Both trucks should plan to go to the truck inspection gate prior to entry to Jorgensen Forge and Plant 2.

I would like to schedule the pickups/shipments for **Monday, 4/10/11** at 7:30am at the Jorgensen site for the short-tail truck and **8:00** am for the regular truck shipping the waste off-site.

I will be the on-site contact, 206-715-7981, and Andy Howe should be listed so that he can print out the shipping manifest for me.

The chargeline would be:

9L 6837000 9LPERPSPLT2 7KPL2JOR X 22 99NR 535
